BSc, Computer Science

Budapest, HU

- Proficient in Web Development and Data Science with Python; adept in leveraging Object Oriented principles for software design.
- Skilled in Java for Concurrent and Multithreaded Programming, coupled with expertise in efficient Database Design and Management.

PROJECTS, CERTIFICATIONS, SKILLS & INTERESTS

Pixel Ratings

- Pixel Rating is a mobile app for game review and rating system where users can register and rate the games they have played. The system will store user data in a database, including their username, password, and personal information. Once registered, users can search for games, read reviews, and rate games on a scale of 1 to 10. The system will then calculate the average rating for each game and update it.
- Technologies: React Native, Firebase, Rest API

Tatooine

- Spearheaded the design and development of a 2D real-time city builder game along the lines of the classic SimCity, as part of a collaborative team effort.
- Collaboratively created and maintained UML diagrams, use case scenarios, and comprehensive user stories to guide the development process and ensure alignment with project objectives.
- Technologies: JavaScript

Skills: Java, Python, PHP, PowerShell, JavaScript, React, HTML/CSS, SQL (MS SQL Server/ MySQL), MS Azure, Git, Rest API, C/C++

Certifications: IoT Fundamentals by Cisco Networking Academy: CCNA (Routing and Switching), IELTS (Score:

6.0), Java (Basic) by HackerRank, SQL (Intermediate) by HackerRank
