BSc, Computer Science   *Budapest, HU*

PROJECTS, CERTIFICATIONS, SKILLS & INTERESTS

Pixel Ratings

- Pixel Rating is a native mobile app for game review and rating system where users can register and rate the games they have played. The system will store user data in a Firebase, including their username, password, and personal information. Once registered, users can search for games, read reviews, and rate games on a scale of 1 to 5. The system will then calculate the average rating for each game and update it.
- Technologies: React Native, Firebase, Rest API, NodeJs

Tatooine

- Participate in the design and development of a 2D real-time city-building game inspired by the classic SimCity as part of a collaborative team effort.
- Collaboratively created and maintained UML diagrams, use case scenarios, and comprehensive user stories to guide the development process and ensure alignment with project objectives.
- Technologies: JavaScript
